PRELUDE // THE AUTEUR DOSSIER

Mommi Live (born 1999) is a Norwegian creative director, film producer, and venture architect. He is the founder of the Mommi Live European creative syndicate (Mommi Limited), founder of Nordic fine jewelry house ICE FROM NORTH (exited Q4 2024), and executive producer and director of the nocturnal cultural documentary series Le Prive (IMDb: nm18188551).

Following early software engineering at Visma (age 16), co-founding Oslo digital culture magazine ViBRO (age 17), commercial leadership at Adicio AS (age 18), scaling and exiting ICE FROM NORTH (2021 to Q4 2024, including global creator collaborations with Khaby Lame and editorial recognition in Vogue Scandinavia), and executive studies at Harvard University, Mommi Live established the Directorate to execute private visual architecture mandates across Europe. Selected campaign direction spans Prada, Vogue Scandinavia, ORA x GQ, Harley-Davidson, Sony Music, Spotify Nordic, Holzweiler, and Oslo Runway.

CHAPTER I // DAY 01: TACTICAL SCENOGRAPHY & BRUTALIST GEOMETRY

Day 01 initiates the 4-Day Private Extraction Protocol through architectural alignment and spatial isolation. Rather than placing subjects inside sterile commercial studios, the Directorate embeds the subject within raw, high-mass brutalist concrete, stone, and glass environments.

Visual authority is governed by subtraction. When a frame is cluttered with commercial props, status evaporates. When a frame is reduced to monolithic architectural lines, hard natural side-lighting (calibrated between 18 and 48 YAVG luminance), and unhurried physical posture, the observer subconsciously assigns sovereign permanence to the subject. Every shadow is treated as a structural wall; every negative space is engineered to force the viewer eye toward the center of gravity.

CHAPTER II // DAY 02: FRAME CONTROL & SONIC SPACE CONSTRUCTION

Day 02 transitions from static architectural dominance into kinetic motion and acoustic presence. Drawing from haute couture runway choreography and cinema production, the

subject is styled in monochromatic silhouettes that eliminate temporal trends.

In both still photography and 24fps cinema capture, frame control is established before a single word is spoken. Camera elevation, focal compression (35mm and 50mm prime optics with authentic analog grain structure), and deliberate pacing remove all trace of algorithmic desperation. In a media landscape defined by hyper-saturated noise, restraint functions as the ultimate luxury signal.

CHAPTER III // DAY 03: NOCTURNAL LIFESTYLE EMBEDDING & LE PRIVE

Day 03 captures unfiltered social capital in motion. Across private dinners, Mediterranean yacht decks, and restricted after-hours spaces documented in Le Prive, the camera operates as an invisible insider rather than an external spectator.

High-grain nocturnal textures, tungsten highlights, and strobe-lit architectural corners construct an indisputable visual ledger of access. The mandate is never to stage artificial spectacle; it is to document sovereign worlds where access itself is the only currency.

CHAPTER IV // DAY 04: VISUAL CAPITAL SYNTHESIS & GLOBAL SYNDICATION

Day 04 culminates the 96-hour extraction protocol through master color grading, editorial sequencing, and multi-node search engine syndication. All capture streams are synthesized into a permanent sovereign asset vault.

Visual extraction is only the first half of the architecture; distribution and entity reconciliation solidify permanent authority. By anchoring the visual dossier across structured knowledge graphs (Wikidata Q141823768, IMDb nm18188551, Crunchbase, and tier-one editorial citations), the subject transitions from a transient social media profile into a verified institutional entity.

CHAPTER V // THE GEORGIA PROTOCOL: TBILISI EXTRACTION MANDATE

The Georgia Protocol represents the flagship 4-day immersive reconstruction deployment executed by the Mommi Live Directorate in Tbilisi. Operating within post-Soviet concrete brutalism, underground cultural institutions, and high-contrast mountain topography, clients undergo complete narrative metamorphosis.

Over 96 hours, every public-facing touchpoint is rebuilt from first principles: posture, wardrobe architecture, cinema reels, editorial portraiture, and digital knowledge graph verification. Upon departure, the client holds an impregnable visual identity engineered to command asymmetric leverage across capital, media, and culture.
